Microsoft

## Joint Value Proposition

SUSE provides seamless integration of open source software with Microsoft Azure services for customers that have mission-critical applications. Customers gain greater choice and flexibility required for hybrid cloud environments – with certified workloads, unified system management, 24x7 Linux support from SUSE, plus support for enterprise applications from Microsoft and SUSE.

SUSE and Microsoft's long-term partnership spans over 1000+ customers and is aimed at delivering innovative and high performance solutions for Microsoft Azure.
